

## MAHEC Addiction Psychiatry Fellowship

Located in beautiful Asheville, NC, our Addiction Psychiatry Fellowship gives trainees an opportunity to work with nationally recognized faculty in Addiction Psychiatry and Addiction Medicine. Fellows rotate through residential, inpatient, and outpatient settings. Our trainees benefit from our variety of academic and community-based partnerships with an emphasis on serving a diverse rural population.

As the only Addiction Psychiatry Fellowship in the state of North Carolina, we are committed to the goal of training physicians to provide mental health and addiction treatment services in rural and medically underserved communities in Western North Carolina where overdose rates are higher than state and national averages and rising.

We aim to graduate well-trained leaders in the field of Addiction Psychiatry with a firm foundation in the current evidence of care delivered both equitably and with compassion for those suffering from the disease of addiction.

We invite you to [explore our program](#), contact us with any questions, and submit your application for consideration.
